Title

As I am the first in my family to attend college, I am very thankful to have come thus far. I am looking forward into advancing and challenging myself to learn and become better at the skills I do. The decision to go to college was a good one to make, but there was a lot of contemplating where to go and what degree to pursue. College is an important next step in my life to extend my learning experiences and advance myself in my chosen career path.

I had to decide where to attend college at. I had decided long before that I wanted to stay near home, so my choice were very limited. I limited down to either East Tennessee State University or Northeast State Technical Community College. After researching, I decided to apply for ETSU, and after waiting for an answer, I was accepted.

Many factors contributed into my decision of attending college. I want to be able to be financially secure whenever I am older. Many studies show that people with college degrees make more money in their lifetime than non-graduates. I also want to be able to have a job in which I am interested in the work I am doing.

The primary reason I wanted to attend college was to be able to learn. In learning about different subjects, you can learn about yourself. I like exploring new ideas and concepts. Socrates once said, "The unexamined life is not worth living."

College is the next step for me so that I will be able to challenge myself and advance in my chosen field. My choice of going to college will not be one that I will regret.
