
Hw 6 Due April 20th by 11:59 (Counts as two homework grades)

Posted Apr 10, 2012 7:58 AM

Part 1) Finish the string matching.

- 1) Ask user for pattern and text.
- 2) Use KMP to find all matches
- 3) Display each match that is found

String Matching Example:

Enter Text: aaaa

Enter Pattern: a

Pattern found starting at shift 0.

Pattern found starting at shift 1.

Pattern found starting at shift 2.

Pattern found starting at shift 3.

Part 2) #3 on the file lab. Make sure you can convert the file to binary and back to text.

Update the code used during the file lab so that an integer is appended to the end of each record. A new txt file is attached for testing.
